

Quality Policy

Luxfer Gas Cylinders Riverside is a manufacturing facility that produces high-pressure composite and steel cylinders and aluminum liners.

Key markets served by our products include SCBA, Alternative Fuel, Medical, Inflation, Aerospace and Oil & Gas Sampling. Our products are supplied to countries around the world.

In support of our vision to be the most dynamic cylinder company, producing innovative products in the gas containment industry, we affirm that commitment to quality is vital to achieving our goal.

It is the policy of Luxfer to:

- Satisfy all customer and regulatory requirements
- Enhance customer satisfaction
- Drive continual improvement of the Quality Management System

We will accomplish these goals by:

- Setting objectives in support of our Customer Commitment and our Strategy
- Educating, developing and training our people
- Effective monitoring of performance against targets
- Effective communication of customer requirements, customer feedback, and quality objectives and targets.
- Periodic review and revision of QMS practices to improve performance

Luxfer Management is committed to active participation in the implementation and review of the QMS.

For the Luxfer Composites Leadership Team,

A handwritten signature in black ink, appearing to read 'H Mead', is written over a light blue horizontal line.

Howard Mead

Vice President & General Manager, Luxfer Gas Cylinders

Meeting Requirements * Satisfying Customers * Continually Improving
